Upgraded Software Makes It Easier to Download More Library Titles to More Devices!

Want to download an audiobook to your iPod® and the iPhone™? Looking for a quicker way to get books onto your MP3 player? Make all your downloads easier by upgrading to OverDrive Media Console™ v3.2. The upgrade to the free application is available on the Naperville Public Library's (NPL) website, www.naperville-lib.org. Then click on the "Downloadable Materials" link that is in the first column, left corner of the Library's homepage. It is recommended that former as well as new users upgrade in order to take advantage of the new features.

The upgrade offers more options and choices to iPod®, iPod Shuffle®, iPhoneT, iPod Touch®, and iPod Nano®, and the iPhone™ users. With OverDrive Media Console™ v3.2, the vast majority of OverDrive WMA Audiobooks can be transferred to the iPod® and the iPhone™! To ensure quality sound while minimizing file transfer times, Transfer Wizard will prompt you to adjust your iTunes® settings (if desired) before you begin a transfer. If you do adjust your settings, once the transfer is complete, Transfer Wizard displays a recap of your original settings as well as detailed steps on restoring iTunes® to its original settings. Additionally, if you're a fan of iTunes® and enjoy OverDrive MP3 Audiobooks, you can now specify iTunes® and/or your portable device as a destination in the course of completing a file transfer. Finally, OMC v3.2 offers enhanced support for the iPod Shuffle® -- with iTunes v8.1 (or newer) installed, you can now use Transfer Wizard to send OverDrive content to most iPod Shuffles®.

In addition, the upgrade offers:

- multiple playspeeds,
- bookmarking,
- a 'resume from most recently played point' button,

- and built-in Transfer and Burn Wizards, allowing users to transfer OverDrive titles to portable devices and burn to CD in just a few clicks.

Users who want help with the upgrade can view an online tutorial that is also available on the NPL website. Confused about what titles can be downloaded to what devices? Use the handy icons that show which titles are available for MP3s or iPod®.

For more information about the upgrade or NPL's downloadable collection contact: Donna Pistolis, Collection Development Coordinator at 630-961-4100 ext. 6380.
