Can You Fit Through An Index Card?

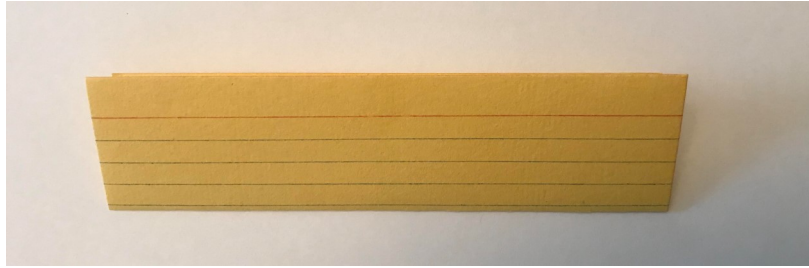

Materials needed:

3×5 index card

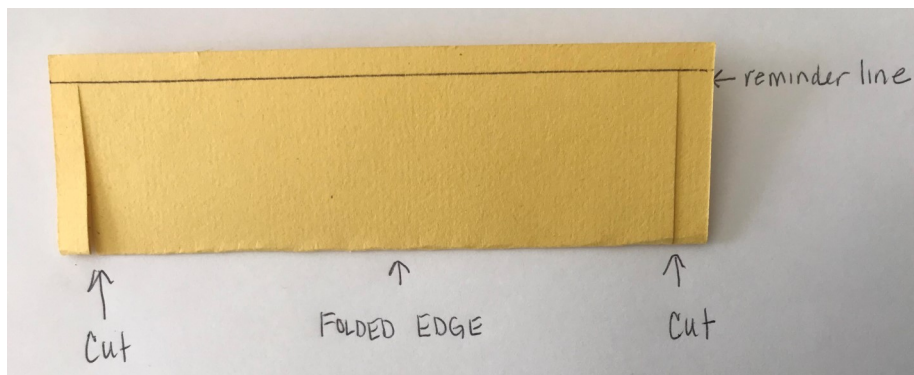

Scissors

INSTRUCTIONS:

STEP 1: Fold the index card in half lengthwise.

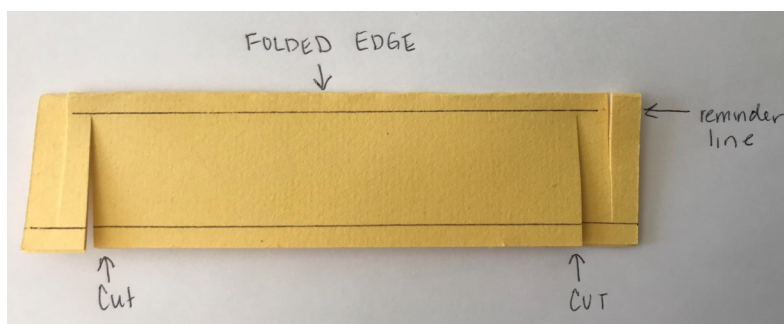

STEP 2: Make two cuts, one on each end, starting from the folded edge. Don't cut all the way up to the top. You can draw a line across the top as a reminder of where to stop cutting.

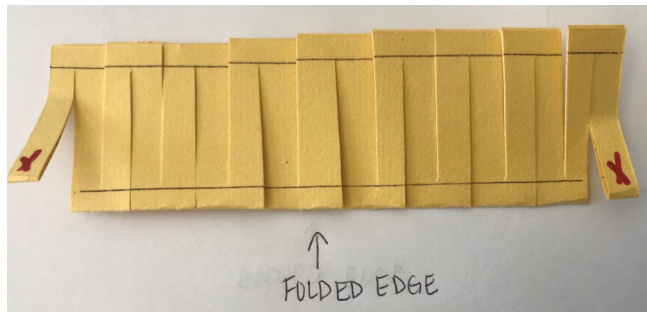

STEP 3:

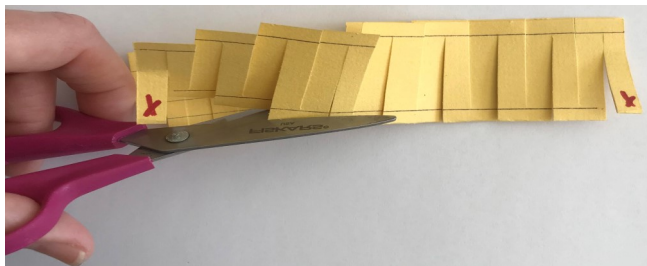

Turn the paper over so the folded edge is facing away from you and cut from the non-folded side up toward the fold. Do not cut all the way to the end. Make another reminder line as a guide.

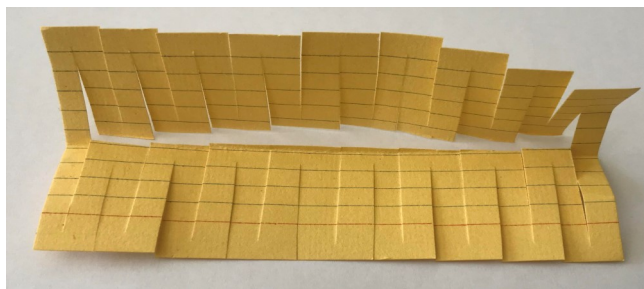

STEP 4: Alternate cutting until you reach the middle. Turn the card so the fold is closest to you. Mark the first and last fold and gently fold them up.

STEP 5: Slide the scissor into the “loops” that you have made on the folded side. You will not be cutting the first or last marked loop so leave those out. Cut through the remaining loops.

STEP 6: Open up the index card. It should look like this. You can see that everything has been cut apart except for the two ends.

STEP 7: Carefully stretch it apart to get this chain. Climb in!!
