

## Screen Free Project for Elementary School

# Rainbow Rock Garden

## Instructions:

**Material:** Clean rock, hair dryer, crayons, paper plate.

- Place clean rock on paper plate to protect work area.
- Hold hair dryer a few inches above rock, turn on high heat, and warm rock for 20 seconds.
- Color, with crayons, directly on the warm rock. (This will warm up the crayon and get lots of wax on the rock).
- Once you have enough crayon on the rock, stop coloring. Turn hair dryer on high, aim it at the spot just colored, allowing wax to melt and run.
- Repeat Process with different crayon colors to create a rainbow rock.
- Place the rock in your garden, or another favorite location.
